Equipped for Your Needs... Dedicated to Your Objectives!

Cook Drilling Company means *knowledgeable, experienced and professional crews* and late model equipment to get the job done right and done on time! Those factors combined with our dedication and loyalty to our customers make us the **SMART CHOICE** for all of your drilling requirements.

Cook Drilling Company pays close attention to every detail. We medically monitor our employees to ensure a safe, quality work environment. And we follow every job through completion, including all state and local filings for well abandonments. *We continually look after our clients' interests, day in and day out!*

Our 28 years of success and steady growth are a direct result of our loyalty to our clients. We strive to serve our clients by providing timely job completion and pay particular attention to the small details. Traits that separate us from the competition. Traits that make our clients use our services again and again!

Our History Serving Your Future!

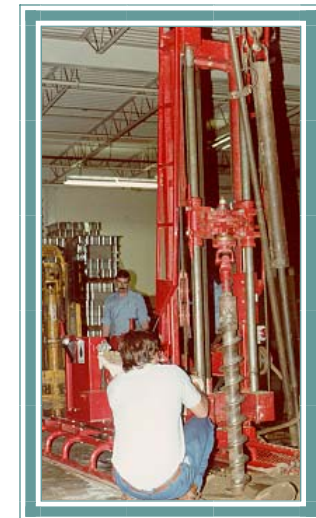

Established in 1979, **Cook Drilling Company** began operating to serve the drilling needs of Southwestern Michigan and Northern Indiana engineering firms. In 1986 we expanded our mission to begin serving the growing environmental field. We acquired specialized soil and water sampling equipment necessary to serve our environmental clients, and insured that our staff was, and remains, thoroughly trained to effectively utilize that equipment. **Our focus then was to be properly equipped, dependable, knowledgeable and price our services to fit our clients' budgets. That focus remains the same today and will be the same tomorrow!**

Licensed For All Types of Drilling in Indiana
